FREIGHT UNIVERSITY

Big Rig, Small Kitchen

75 PRACTICAL RECIPES

FOR THE TRUCK CAB

Michael Thomas

TITLE

Big Rig, Small Kitchen

75 practical recipes for the truck cab

By Michael Thomas Freight University

A usable kitchen in a small space

Cold meals, microwave bowls, measured 12V hot holding, kettle assembly, shore-power suppers and home-time batch prep. Each recipe includes a photograph, a power note and an estimated Fuel Gauge.

Read before using

Begin with the food-safety and power pages. Choose recipes that fit your actual equipment and facilities. The safest useful meal may be the one that needs no heat.

EDITION AND READER NOTE

About this edition

Prepared October 28 2026

Text copyright 2026 Michael Thomas. Prepared for Freight University. Recipe-development edition with 75 original adaptations informed by the supplied research. No physical cooking trials, appliance load tests, store shelf audit or registered dietitian review have been performed.

Photography and estimates

Cover and all 75 recipe photographs are AI-generated photorealistic serving suggestions. They are not documentary photographs of tested dishes. Nutrition and cost values are estimates from the accompanying editable ingredient model, not laboratory analysis or verified current prices.

Safety and personal needs

This is general cooking education. Follow product labels and appliance manuals, keep food at safe temperatures and obtain individual medical advice when needed. No recipe promises weight loss, driving alertness, treatment or DOT medical qualification.

Print specification

8 x 10 inches, full-color, no-bleed pages with embedded fonts. This combined reading edition includes the front cover. A separate interior PDF and front-cover PDF are supplied for print production. A printer-specific spine and back-cover wrap require the selected binding and paper specification.

YOUR CAB KITCHEN

A meal that fits the cab

Start with one meal

You do not need a full kitchen to make a useful change. You need a safe place to park, food you can keep at the right temperature, a clean bowl and a plan that fits your power. Choose one breakfast and one lunch you would actually eat. Buy those ingredients first.

What this book does

These 75 recipes use overlapping ingredients, small batches and ordinary equipment. Some are full dinners. Others are lighter breakfasts, snacks or drinks. Every recipe states the portion, preparation time, heating method and an estimated Fuel Gauge. Read the complete method before opening food.

What the road changes

A long line at the fuel island, a late appointment or a full parking lot can change dinner. Keep two ready-to-eat pantry meals available. A safe cold meal is useful when the hot plan no longer fits. Do the cooking and eating while parked.

Your first useful habit

Before shopping, look at the food already in your cab. Write down its use-by dates and choose the next three meals from that list. The least expensive ingredient is often the one you already bought and can use safely.

YOUR CAB KITCHEN

Read the page before you cook

The recipe spread

Each recipe has a numbered photo page followed by the working recipe. Photographs show an AI-generated serving suggestion, not evidence that a dish was cooked or tested. Ingredients, measured temperatures and package directions control the method.

Times include waiting

Prep means hands-on assembly. Heat is an estimated appliance running time. Rest or chill is separate. Total includes all three and excludes optional hot holding. Frozen food may need thawing time in the refrigerator before a recipe begins.

Measure the portion

Ingredients make the stated yield. Divide a four-serving batch into four equal portions before eating. Household measures are paired with approximate edible weights. A line such as 1.5 x a 74 g chicken pouch means 111 g total chicken; refrigerate the opened remainder promptly.

Use the panel honestly

The Fuel Gauge is an estimate for the listed ingredients and portion. It includes the specified toppings. Extra cheese, sauces, salt, cooking oil or a larger tortilla change the numbers. Brand labels and measured portions give you a better personal estimate.

YOUR CAB KITCHEN

Choose your power tier

Tier 0 No cooking power

Cold assembly. Fridge or cooler energy is additional, so 0 W never means no cold-storage requirement. Only unopened products labeled shelf stable may stay out before opening. Yogurt, eggs, prepared salads and cut produce need dependable cold storage.

Tier 1 Direct 12V holding

A compatible direct-12V warmer may draw about 45-144 W; a small 12V slow cooker may be labeled around 96 W. These are planning examples from the research, not verified universal specifications. Read your exact unit and socket labels. Chapters 4 and 5 require a separate fast-heating source before holding.

Tier 2 Microwave or kettle

The microwave methods assume 700 W cooking output. The Tundra MW700 example uses up to 1,100 W of input power. A suitable pure-sine system often starts around 1,500 W continuous for that model, but the truck, inverter and appliance makers must approve the combination. Kettles in this book use a planning example of 600-1,000 W input. [S8]

Tier 3 Approved high-draw supply

Skillets, induction plates and air fryers commonly have 1,000-1,800 W nameplate ratings. Use an approved shore circuit or a professionally designed APU/inverter system with adequate continuous capacity, startup allowance and battery support. A 3,000 W label alone is not approval.

YOUR CAB KITCHEN

Watts are only the beginning

Input and output differ

A microwave advertised as 700 W normally states cooking output. Size the electrical system using input or maximum consumption on its nameplate. A reduced power setting may cycle a heating element at full draw; it does not always reduce the highest current. [S8]

A worked battery example

At a nominal 12 V and an assumed 85% inverter efficiency, a 1,100 W AC load draws about 108 A from the batteries: 1,100 divided by 12 divided by 0.85. Three minutes is about 55 Wh of AC energy, or about 5.4 Ah from the nominal 12 V bank. Voltage, efficiency and wiring losses vary.

Small loads add up

A 96 W direct-12V appliance uses about 8 A at 12 V. Holding for 3.5 hours would use about 28 Ah before other losses. A small watt number is not unlimited battery life. Preserve starting reserve and obey the truck's low-voltage limits; never bypass a cutoff.

Let an installer size the system

Cable size, run length, battery chemistry, fuse protection, grounds and connectors belong in a qualified installation plan. This book does not prescribe a universal wire gauge or battery fuse. Never increase a socket fuse to fit an appliance. Keep the fridge operating on its approved supply; do not routinely disconnect it to make cooking fit.

YOUR CAB KITCHEN

Make a safe parked workspace

Start with permission

Check the carrier's appliance policy and the manuals for the truck, inverter and appliance. Use listed equipment appropriate for the supply. Check continuous load capacity, cord condition and required clearances. One heating appliance at a time is this book's working rule, with room for essential loads.

Keep heat away from the berth

Use a stable, heat-resistant work surface with ventilation and open appliance vents. Keep bedding, paper, curtains and clothing away. Do not cook on a bunk, lap, dashboard or steering-wheel tray. Route cords so they cannot snag, spill hot food or block an exit.

All electric

Do not use propane, butane, charcoal or other combustion cooking devices inside the cab. An open window does not make that safe. Do not idle an engine to satisfy a recipe; check the current state, local, facility and carrier restrictions and use an approved supply.

Stay with the process

This edition specifies parked, attended cooking and monitored holding. It does not authorize heating equipment while the truck moves. A lid strap does not establish crash-safe mounting. If power fails or a cord or connector becomes hot, stop using the setup and follow the equipment instructions. For a fire, prioritize escape, call emergency services and do not throw water onto burning oil or energized equipment.

YOUR CAB KITCHEN

Keep cold food cold

Check with a thermometer

Keep a fridge or food cooler at 40 F or below and a freezer at 0 F or below. Put a separate appliance thermometer where it reflects the food area, not against the cooling plate. Check before stocking, after stops and during hot weather. A display setting is not proof of food temperature. [S3]

Cooler is a job description

A compressor fridge or an ice cooler can work if it actually holds the temperature. A thermoelectric box that cools only relative to the cab air may not. Keep perishables in sealed packages, out of meltwater, and replenish ice as needed. If you cannot verify cold storage, buy shelf-stable single portions and open only what you will eat.

Watch the time

Perishable food should not be left unrefrigerated for more than 2 hours, or 1 hour when ambient temperature is above 90 F. Count shopping, loading and meal assembly together. Returning food to the fridge does not reset earlier exposure. When storage history is unknown, discard it; smell and taste do not establish safety. [S3]

Maintain the cold chain

Transport groceries and home-prepped portions in an insulated cooler with enough ice or frozen packs. Put cold foods away first. Keep raw meat in a sealed leakproof container below ready-to-eat foods. Buy small quantities that leave air circulation around them.

YOUR CAB KITCHEN

Heat food by temperature

Carry a food thermometer

Use a clean instant-read food thermometer suitable for thin food. Check its accuracy according to its instructions; clean the probe before and after use. Probe the thickest part and several spots in mixed dishes, avoiding contact with the hot bowl. [S2]

The temperatures in this book

Raw poultry and ground poultry: 165 F. Fish: 145 F in the thickest part. Egg dishes: 160 F and fully set. Leftovers and mixed reheated meals: 165 F throughout. These endpoints do not make spoiled or badly stored food safe again. [S1, S2]

Microwave in stages

Use microwave-safe containers, never metal or a sealed jar. Cover with a vented lid, stir and rotate where needed, and allow standing time. The recipes assume 700 W cooking output; for another microwave, follow its directions and use short additional bursts until the measured endpoint is reached. A hot edge can surround a cold center. [S1]

Package instructions matter

Frozen vegetables and convenience foods may need cooking rather than thawing. Follow their package directions. Kettle recipes require instant products that permit boiling-water preparation and proteins already labeled ready to eat. Hot water poured over raw meat, raw egg or ordinary dry pasta is not a safe shortcut.

YOUR CAB KITCHEN

Use 12V equipment conservatively

Separate reheating from holding

USDA advises against reheating leftovers in a slow cooker because the food may warm too slowly. Previously cooked and chilled food should be rapidly reheated in a microwave, on a stove or in a suitable oven, then transferred hot to compatible holding equipment. Chapters 4 and 5 use that sequence. [S1, S4]

The transfer protocol

Keep ingredients cold until needed. Rapidly heat the entire meal to 165 F, stirring and checking several locations. Prepare the holding appliance exactly as its manual requires. Do not preheat an empty crock or put hot food into cold glass or stoneware unless the maker permits it. Transfer promptly using an approved heat-safe container.

Verify the hold

Check that food remains at 140 F or above in several places. Keep covered and check again at least every 30 minutes while parked. This book limits optional holding to 60 minutes for practicality; that is an editorial limit, not a statement of a legal maximum. If the unit cannot maintain 140 F, serve immediately after fast heating instead of using it for holding. [S4]

If you only have 12V

You do not have the fast-heating source assumed by these 17 recipes. Choose the no-cook meals, eat suitable ready-to-eat ingredients cold, or obtain an approved rapid-heating source. A warmer's name, a watt rating, steam or a manufacturer marketing claim does not validate every food load. Never put frozen meat, raw beans or chilled leftovers into this book's holding process.

YOUR CAB KITCHEN

Clean with limited water

Plan the wash before the meal

Carry potable water reserved for handwashing and cleaning, soap, a catch basin, clean towels, a brush and a lidded container for wastewater. Have enough water to wash and rinse properly. If you cannot do that, use safe ready-to-eat food and clean single-use utensils; save raw-meat cooking for home.

Hands first

Wash hands with soap and clean running water for at least 20 seconds, before food preparation and after raw meat, trash or restroom use. A clean dispensing jug can supply running water into a basin. Hand sanitizer or a damp wipe is not a full replacement when hands are dirty. [S3]

Wash then rinse then sanitize

Scrape food into trash. Wash reusable food-contact items with detergent and potable water, then rinse. When sanitizing, use a product labeled for food-contact surfaces and follow its dilution, wet-contact time and rinse directions; allow air drying. Household disinfectant wipes are not automatically suitable for dishes. Never mix cleaning chemicals. Wiping grease away is only the first step. [S5, S12]

Contain the waste

Collect wastewater and dispose of it at an authorized drain or facility. Do not dump it on a catwalk, parking lot or storm drain. A foil liner reduces mess but does not clean an appliance, utensils or hands. Use liners only where the appliance manufacturer permits them, and never use foil in a microwave.

YOUR CAB KITCHEN

Shop for the next three meals

Stock up with permission

Use home time or a grocery stop where management permits truck parking. Plan the route and the stop before arrival. Travel-center shelves vary by location and day; this book does not promise that a chain carries every listed ingredient or provides free hot water.

Read the whole package

Look for ready-to-eat proteins, plain oats, no-salt-added canned beans and tomatoes, plain rice, unsalted nuts and portion-size dairy. Compare sodium per amount you will actually eat. No salt added does not mean sodium free. A pouch can contain more than one serving. [S9]

Fresh top-ups

Check for intact cold egg packs, plain yogurt, washed carrots, whole fruit and prewashed vegetables. Buy only what you can hold safely. Prewashed ready-to-eat produce saves water; follow its label. Rinse whole produce under potable running water before cutting, even when you will discard the peel.

Use substitutions with care

Swap one no-salt-added bean variety for another or use a different rinsed fruit. Recalculate nutrition from labels. Raw meat, dry beans and dry grains are not direct substitutes for cooked or ready-to-eat ingredients. Single-use condiment packets have their own storage directions; take them only with the business's permission.

YOUR CAB KITCHEN

Build a small useful pantry

Shelf-stable until opened

Plain oats; instant couscous; approved steepable noodles; plain potato flakes; chicken, light tuna or salmon pouches; canned no-salt-added beans and tomatoes; unsalted nuts; peanut butter; crackers; tortillas; olive oil; salt-free spices. Keep packages sealed, dry and away from excess cab heat; obey their labels.

Cold space that earns its place

Plain yogurt serves breakfast, tuna wraps and dips. Eggs serve tacos, egg salad and a protein plate. Chicken serves bowls, soup and wraps. Cabbage works in slaw, wraps and noodles. A small bag of washed produce is more useful than a large one you cannot finish.

Useful tools

A fridge thermometer, food thermometer, can opener, measuring cup and spoons, clean cutting board, safe knife, two microwave-safe bowls with vented lids, shallow meal containers and proper washing supplies. Choose sizes that fit the appliance and your storage before buying.

Open with a plan

Date opened foods. Refrigerate leftovers promptly in shallow containers and follow the shortest product storage instruction. This book generally uses a conservative 2-day meal-prep window once refrigerated or thawed, shorter than the usual 3-4 days for safely handled cooked leftovers. Freeze extra portions at home rather than storing a week of chilled meals in the cab. [S3]

YOUR CAB KITCHEN

Read the Fuel Gauge

A working estimate

The panels are calculated from an editorial ingredient model of typical food values and assumed grocery unit costs. They are not laboratory analyses, live price quotes or a dietitian's review. The supplied research's four demonstration panels were not copied as verified results. Household weights, brands, draining and cooking losses introduce uncertainty.

The sodium colors

GREEN means an estimated 600 mg or less per serving; YELLOW means more than 600 through 750 mg; RED means more than 750 mg. These are book-specific planning bands, not regulated low-sodium claims or a score for the whole meal. AHA recommends no more than 2,300 mg daily and an optimal goal of 1,500 mg for most adults, with individual exceptions. [S9]

Targets are not prescriptions

About 30 g protein and 6 g fiber in a main meal are editorial planning targets. Some plant-based meals and lighter breakfasts fall below them; the numbers stay visible. Snacks and drinks serve different purposes. This book assigns no universal daily calorie, protein, carbohydrate or water prescription.

Your medical plan comes first

Ask your clinician or registered dietitian about individual targets, especially with kidney disease, heart failure, diabetes, pregnancy, food allergy or medication-related needs. This book cannot determine DOT medical qualification. Food does not replace treatment, rest or the judgment of a medical examiner.

CHAPTER 01 / 8 RECIPES

Rise and Roll Breakfasts

Start with what your shift actually allows. Mix cold oats before your rest, or cook eggs while parked. Breakfast is a meal, not a promise of hours of alertness.

01 Overnight Peanut Butter Banana Oats

02 Apple Cinnamon Cottage Oats

03 Berry Yogurt Crunch

04 Peanut Banana Breakfast Wrap

05 Egg and Black Bean Breakfast Tacos

06 Spinach Egg and Potato Cup

07 Kettle Peanut Butter Oats

08 Cinnamon Breakfast Rice

RECIPE 01 / RISE AND ROLL BREAKFASTS

Overnight Peanut Butter Banana Oats

Mix the base before your off-duty rest. Keep the banana whole until breakfast so it stays fresh.

30 g+ protein / 6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 01 / TIER 0

Overnight Peanut Butter Banana Oats

Makes 1 serving | Prep 3 min | Heat 0 min | Rest/chill 6 hr

Total 6 hr 3 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
460 kcal	30 g	56 g	6 g	14 g	120 mg

Sodium band: GREEN

Food cost approx. $1.58 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1/2 cup rolled oats (40 g)

3/4 cup plain nonfat Greek yogurt (170 g)

1/2 cup 2% milk (120 ml)

1 Tbsp unsalted peanut butter (16 g)

1/2 medium banana (60 g)

Method

1. Stir the oats, yogurt and milk in a clean 3-cup lidded container. Swirl in the peanut butter.

2. Cover and refrigerate at 40 F or below for at least 6 hours. Add banana just before eating; loosen with a splash of potable water if needed.

Contains: milk, peanuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 02 / RISE AND ROLL BREAKFASTS

Apple Cinnamon Cottage Oats

Cottage cheese brands vary sharply in sodium. Compare equal portions before choosing.

6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 02 / TIER 0

Apple Cinnamon Cottage Oats

Makes 1 serving | Prep 4 min | Heat 0 min | Rest/chill 6 hr

Total 6 hr 4 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
445 kcal	24 g	64 g	9 g	13 g	410 mg

Sodium band: GREEN

Food cost approx. $1.89 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1/2 cup rolled oats (40 g)

1/2 cup 2% cottage cheese (113 g)

1/2 cup 2% milk (120 ml)

1 medium apple (180 g), rinsed and cored

1 Tbsp chopped unsalted walnuts (7 g)

1/4 tsp ground cinnamon

Method

1. Stir oats, cottage cheese, milk and cinnamon in a 3-cup container.

2. Cover and chill at least 6 hours at 40 F or below. Dice the apple at serving time and fold it in; scatter walnuts over the top.

Contains: milk, tree nuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 03 / RISE AND ROLL BREAKFASTS

Berry Yogurt Crunch

Use plain yogurt and washed berries. A sweetened cup changes both carbohydrate and added sugar.

30 g+ protein / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 03 / TIER 0

Berry Yogurt Crunch

Makes 1 serving | Prep 3 min | Heat 0 min | Rest/chill 0 min

Total 3 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
350 kcal	32 g	36 g	6 g	9 g	90 mg

Sodium band: GREEN

Food cost approx. $2.25 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 1/8 cups plain nonfat Greek yogurt (255 g)

1/2 cup blueberries (75 g), rinsed

1/4 cup rolled oats (20 g)

1/2 oz unsalted almonds (14 g)

Method

1. Spoon yogurt into a bowl and fold in half the berries.

2. Top with remaining berries, oats and almonds just before eating. For softer oats, stir them into the yogurt and refrigerate 30 minutes first.

Contains: milk, tree nuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 04 / RISE AND ROLL BREAKFASTS

Peanut Banana Breakfast Wrap

Keep the yogurt portion small enough that the wrap closes. Pack extra yogurt separately.

6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 04 / TIER 0

Peanut Banana Breakfast Wrap

Makes 1 serving | Prep 4 min | Heat 0 min | Rest/chill 0 min

Total 4 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
475 kcal	21 g	60 g	8 g	19 g	280 mg

Sodium band: GREEN

Food cost approx. $1.28 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 medium whole-wheat tortilla (45 g)

2 Tbsp unsalted peanut butter (32 g)

1 medium banana (120 g)

3/8 cup plain nonfat Greek yogurt (85 g)

Method

1. Spread peanut butter over the tortilla, leaving a 1-inch border.

2. Lay banana slices down the middle and spoon on yogurt. Fold in the ends and roll firmly. Eat promptly while parked.

Contains: milk, peanuts, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 05 / RISE AND ROLL BREAKFASTS

Egg and Black Bean Breakfast Tacos

For less sodium, serve the filling in a bowl with one tortilla alongside. Removing one modeled tortilla lowers sodium by about 240 mg, to about 630 mg. Never microwave an egg in its shell.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 05 / TIER 2

Egg and Black Bean Breakfast Tacos

Makes 1 serving | Prep 5 min | Heat 5 min | Rest/chill 1 min

Total 11 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
580 kcal	31 g	69 g	13 g	21 g	870 mg

Sodium band: RED

Food cost approx. $1.93 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

2 medium whole-wheat tortilla (90 g)

2 large eggs (100 g edible portion)

1/2 cup canned no-salt-added black beans (85 g), drained and rinsed

2 Tbsp salsa (30 g)

1/2 oz shredded cheddar (14 g)

Method

1. Beat eggs in a microwave-safe 3-cup bowl. Microwave 45 seconds at full power, stir, then continue in 20-second bursts until fully set and at least 160 F.

2. Heat beans separately with 1 Tbsp water, covered and vented, until 165 F. Warm tortillas for 10 seconds if desired.

3. Divide eggs and beans between tortillas. Finish with salsa and cheddar.

Contains: egg, milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 06 / RISE AND ROLL BREAKFASTS

Spinach Egg and Potato Cup

Steam burns. Let the potato rest and cut it on a stable board, away from your lap.

Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 06 / TIER 2

Spinach Egg and Potato Cup

Makes 1 serving | Prep 5 min | Heat 8 min | Rest/chill 2 min

Total 15 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
340 kcal	20 g	32 g	4 g	14 g	270 mg

Sodium band: GREEN

Food cost approx. $1.53 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1 small potato (170 g), scrubbed

2 large eggs (100 g edible portion)

1 cup prewashed baby spinach (30 g)

1/2 oz shredded cheddar (14 g)

Method

1. Pierce the potato several times with a fork. Microwave on a plate 4 minutes, turn, then use 1-minute bursts until easily pierced; rest 2 minutes.

2. Dice the potato carefully. Beat eggs in a separate microwave-safe bowl with 1 Tbsp water; stir in spinach.

3. Microwave 45 seconds, stir, then use 20-second bursts until eggs are fully set and reach 160 F. Fold in potato and cheddar.

Contains: egg, milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 07 / RISE AND ROLL BREAKFASTS

Kettle Peanut Butter Oats

Choose oats whose package permits boiling-water preparation. Rolled oats that require simmering are a different product.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 07 / TIER 2

Kettle Peanut Butter Oats

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 5 min

Total 14 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
470 kcal	29 g	48 g	7 g	19 g	70 mg

Sodium band: GREEN

Food cost approx. $1.51 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1/2 cup plain quick oats (40 g)

2 Tbsp unsalted peanut butter (32 g)

1 Tbsp raisins (10 g)

3/4 cup plain nonfat Greek yogurt (170 g)

1/4 tsp ground cinnamon

3/4 cup potable water (180 ml)

Method

1. Boil the measured potable water in a water-only kettle. Put quick oats, raisins and cinnamon in a heatproof bowl.

2. Pour boiling water over the oats; cover for the package time, about 5 minutes, until soft. Stir in peanut butter.

3. Eat yogurt alongside. Do not put oats, milk or peanut butter inside the kettle.

Contains: milk, peanuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 08 / RISE AND ROLL BREAKFASTS

Cinnamon Breakfast Rice

This is breakfast rice, not dry rice cooked in milk. Start with fully cooked ready-to-eat rice.

Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 08 / TIER 2

Cinnamon Breakfast Rice

Makes 1 serving | Prep 3 min | Heat 3 min | Rest/chill 1 min

Total 7 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
355 kcal	25 g	54 g	3 g	4 g	130 mg

Sodium band: GREEN

Food cost approx. $1.80 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

3/4 cup plain ready-to-eat brown rice (150 g)

1/2 cup 2% milk (120 ml)

3/4 cup plain nonfat Greek yogurt (170 g)

1 Tbsp raisins (10 g)

1/4 tsp ground cinnamon

Method

1. Combine rice, milk, raisins and cinnamon in a microwave-safe 4-cup bowl.

2. Cover with a vented lid. Heat 90 seconds, stir, then use 30-second bursts until 165 F throughout. Stand 1 minute.

3. Let cool to a comfortable eating temperature and swirl in cold yogurt. Eat immediately.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

CHAPTER 02 / 12 RECIPES

RECIPE 09 / NO COOK CAB MEALS

Truck Stop Protein Plate

Buy only intact chilled egg packs. A food display does not prove the temperature of your own cooler.

30 g+ protein / 6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 09 / TIER 0

Truck Stop Protein Plate

Makes 1 serving | Prep 3 min | Heat 0 min | Rest/chill 0 min

Total 3 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
515 kcal	31 g	39 g	9 g	27 g	560 mg

Sodium band: GREEN

Food cost approx. $3.08 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

2 large commercially hard-boiled eggs (100 g), kept cold

2 part-skim string cheese sticks (56 g)

1/2 oz unsalted almonds (14 g)

1 medium apple (180 g), rinsed and cored

3 oz washed baby carrots (85 g)

1/8 tsp ground black pepper

Method

1. Peel eggs with clean hands and season with pepper.

2. Slice the rinsed apple. Arrange eggs, cheese, almonds, carrots and apple on a clean plate. Keep refrigerated components cold until assembly.

Contains: egg, milk, tree nuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 10 / NO COOK CAB MEALS

Tuna Yogurt Wrap

Use the rest of the yogurt in breakfast oats. Refrigerate the opened tuna portion right away.

30 g+ protein / Under $5 estimated / No cook

RECIPE 10 / TIER 0

Tuna Yogurt Wrap

Makes 1 serving | Prep 5 min | Heat 0 min | Rest/chill 0 min

Total 5 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
310 kcal	38 g	32 g	5 g	4 g	550 mg

Sodium band: GREEN

Food cost approx. $2.89 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 1/2 pouches light tuna in water (3.9 oz / 111 g)

3/8 cup plain nonfat Greek yogurt (85 g)

1 medium whole-wheat tortilla (45 g)

1/2 cup chopped rinsed cucumber (75 g)

1/2 cup prewashed shredded cabbage (35 g)

1 Tbsp lemon or lime juice (15 ml)

1/8 tsp ground black pepper

Method

1. Mix tuna with yogurt, lemon juice and pepper. Fold in cucumber.

2. Spread cabbage across the tortilla, add tuna mixture, fold ends inward and roll. Eat promptly or refrigerate immediately.

Contains: fish, milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 11 / NO COOK CAB MEALS

Chicken Apple Pita

The remaining half apple works with peanut butter at your next parked snack break.

30 g+ protein / 6 g+ fiber / Under $5 estimated / No cook

Sodium band: GREEN

Food cost approx. $3.19 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/2 medium apple (90 g), rinsed and cored

3/8 cup plain nonfat Greek yogurt (85 g)

1 small whole-wheat pita (60 g)

1/8 tsp ground black pepper

Method

1. Dice the rinsed apple. Mix with chicken, yogurt and black pepper.

2. Open the pita gently and fill it. Eat over a plate to catch the filling.

Contains: milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 12 / NO COOK CAB MEALS

Chickpea Crunch Salad

A plant-based lighter meal. Its protein is below the book's 30 g main-meal planning target; the panel makes that visible.

6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 12 / TIER 0

Chickpea Crunch Salad

Makes 1 serving | Prep 7 min | Heat 0 min | Rest/chill 0 min

Total 7 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
370 kcal	14 g	54 g	16 g	13 g	50 mg

Sodium band: GREEN

Food cost approx. $2.02 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 cup canned no-salt-added chickpeas (170 g), drained and rinsed

1/2 cup chopped rinsed cucumber (75 g)

1/2 cup rinsed chopped tomato (90 g)

1 cup prewashed shredded cabbage (70 g)

2 tsp olive oil (10 ml)

1 Tbsp lemon or lime juice (15 ml)

1/8 tsp ground black pepper

Method

1. Whisk olive oil, lemon and pepper in the serving bowl.

2. Add drained chickpeas, cucumber, tomato and cabbage. Toss well. Let stand 5 minutes for flavor if time allows; eat or refrigerate.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 13 / NO COOK CAB MEALS

Salmon and White Bean Salad

Choose canned pink salmon and compare sodium. Oil-packed and seasoned versions change the estimate.

RECIPE 13 / TIER 0

Salmon and White Bean Salad

Makes 1 serving | Prep 5 min | Heat 0 min | Rest/chill 0 min

Total 5 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
365 kcal	29 g	39 g	11 g	10 g	280 mg

Sodium band: GREEN

Food cost approx. $2.94 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

3 oz canned pink salmon (85 g), drained

3/4 cup canned no-salt-added white beans (135 g), drained and rinsed

1/2 cup chopped rinsed cucumber (75 g)

1/2 cup rinsed chopped tomato (90 g)

1 tsp olive oil (5 ml)

1 Tbsp lemon or lime juice (15 ml)

1/8 tsp ground black pepper

Method

1. Drain salmon and break it into flakes, removing hard bones or skin if preferred.

2. Toss beans, cucumber and tomato with oil, lemon and pepper. Fold in salmon gently.

Contains: fish. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 14 / NO COOK CAB MEALS

Hummus Chicken Lunch Box

Keep pita dry in its own compartment. Read hummus labels for sesame and sodium.

30 g+ protein / 6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 14 / TIER 0

Hummus Chicken Lunch Box

Makes 1 serving | Prep 4 min | Heat 0 min | Rest/chill 0 min

Total 4 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
390 kcal	34 g	40 g	9 g	11 g	730 mg

Sodium band: YELLOW

Food cost approx. $3.58 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/4 cup hummus (60 g)

3 oz washed baby carrots (85 g)

1/2 cup chopped rinsed cucumber (75 g)

1/2 small whole-wheat pita (30 g)

Method

1. Place chicken and hummus in separate compartments of a clean lunch box.

2. Add carrots and cucumber; cut pita into wedges. Dip and assemble small bites while parked.

Contains: sesame, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

Food cost approx. $2.64 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

3 large commercially hard-boiled eggs (150 g), kept cold

3/8 cup plain nonfat Greek yogurt (85 g)

1 medium whole-wheat tortilla (45 g)

1/2 cup chopped rinsed cucumber (75 g)

1/8 tsp ground black pepper

Method

1. Chop peeled hard-boiled eggs with a clean fork and mix with yogurt and pepper.

2. Fold in cucumber. Spoon onto the tortilla, tuck in the ends and roll. Eat promptly or keep cold.

Contains: egg, milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 16 / NO COOK CAB MEALS

Peanut Chickpea Slaw

This is a plant-based meal with less than 30 g protein. Adjust portions to your plan rather than calling every bowl high protein.

6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 16 / TIER 0

Peanut Chickpea Slaw

Makes 1 serving | Prep 7 min | Heat 0 min | Rest/chill 0 min

Total 7 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
415 kcal	18 g	49 g	14 g	19 g	80 mg

Sodium band: GREEN

Food cost approx. $1.57 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

3/4 cup canned no-salt-added chickpeas (128 g), drained and rinsed

1 cup prewashed shredded cabbage (70 g)

1/2 cup prewashed shredded carrots (55 g)

2 Tbsp unsalted peanut butter (32 g)

1 Tbsp lemon or lime juice (15 ml)

1/8 cup potable water (30 ml)

1/4 tsp ground ginger

Method

1. Stir peanut butter, lemon, ginger and 2 Tbsp potable water until pourable.

2. Toss with chickpeas, cabbage and carrots. Let the slaw soften 5 minutes before eating.

Contains: peanuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 17 / NO COOK CAB MEALS

Southwest Chicken Bean Salad

Salsa provides seasoning; add it by the tablespoon instead of pouring from the jar.

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1 small potato (170 g), scrubbed

1 cup frozen broccoli florets (90 g)

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/2 oz shredded cheddar (14 g)

Method

1. Pierce potato. Microwave on a plate 4 minutes, turn, then use 1-minute bursts until tender. Stand 2 minutes and split carefully.

2. Place broccoli in a covered vented bowl with 2 Tbsp water. Microwave according to its package until fully cooked; drain carefully.

3. Add chicken and heat in short bursts until 165 F. Pile over potato and finish with cheddar.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 23 / MICROWAVE MEALS

Lentil Curry Rice

Tomato juice keeps the lentils moist. Use a salt-free curry blend, not a salty curry packet.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 23 / TIER 2

Lentil Curry Rice

Makes 1 serving | Prep 3 min | Heat 5 min | Rest/chill 1 min

Total 9 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
415 kcal	19 g	71 g	17 g	7 g	60 mg

Sodium band: GREEN

Food cost approx. $2.07 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

3/4 cup plain ready-to-eat brown rice (150 g)

3/4 cup cooked no-salt-added lentils (150 g), ready to eat

1/2 cup no-salt-added canned diced tomatoes with juice (120 g)

1 cup prewashed baby spinach (30 g)

1/2 tsp salt-free curry powder

1 tsp olive oil (5 ml)

Method

1. Combine rice, lentils, tomatoes, curry and oil in a 4-cup microwave bowl.

2. Cover and vent. Heat 2 minutes, stir, add spinach and continue in 30-second bursts until 165 F. Stand 1 minute.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 24 / MICROWAVE MEALS

Tuna Pea Pasta

Use a deep bowl and watch for boil-over. Pasta shapes vary; package guidance and tenderness decide the time.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 24 / TIER 2

Tuna Pea Pasta

Makes 1 serving | Prep 5 min | Heat 16 min | Rest/chill 1 min

Total 22 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
410 kcal	44 g	54 g	10 g	2 g	300 mg

Sodium band: GREEN

Food cost approx. $2.77 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

2 oz dry whole-wheat short pasta (56 g)

1 1/2 pouches light tuna in water (3.9 oz / 111 g)

1/2 cup frozen peas (80 g)

3/8 cup plain nonfat Greek yogurt (85 g)

1 Tbsp lemon or lime juice (15 ml)

1/8 tsp ground black pepper

1 1/2 cups potable water (360 ml)

Method

1. Put pasta and measured water in a microwave-safe 8-cup bowl. Cover loosely and vent; heat 4 minutes, stir, then use 1-minute bursts until pasta is tender, about 10-14 minutes total. Add water if needed.

2. Stir in peas and cook for the package time. Carefully drain excess liquid.

3. Add tuna; heat and stir until 165 F throughout. Stand 1 minute, then fold in yogurt, lemon and pepper.

Contains: fish, milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 25 / MICROWAVE MEALS

Quick Turkey Chili Bowl

Raw ground turkey is not a substitute for the fully cooked ingredient in this recipe.

30 g+ protein / 6 g+ fiber / Under $5 estimated

RECIPE 26 / TIER 2

Egg and Edamame Rice

Makes 1 serving | Prep 5 min | Heat 7 min | Rest/chill 1 min

Total 13 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
465 kcal	28 g	54 g	10 g	15 g	390 mg

Sodium band: GREEN

Food cost approx. $2.15 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

3/4 cup plain ready-to-eat brown rice (150 g)

2 large eggs (100 g edible portion)

1/2 cup frozen shelled edamame (75 g)

1/2 cup prewashed shredded carrots (55 g)

1/4 cup frozen peas (40 g)

1 tsp reduced-sodium soy sauce (5 ml)

Method

1. Cook edamame and peas in a covered vented bowl with 2 Tbsp water according to their packages. Drain carefully.

2. Beat eggs in another microwave-safe bowl. Heat 45 seconds, stir, then use 20-second bursts until fully set and 160 F.

3. Mix rice, cooked vegetables, carrots and soy sauce. Heat covered in short bursts, stirring, to 165 F. Fold in cooked eggs and serve.

Contains: egg, soy, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

Sodium band: GREEN

Food cost approx. $2.23 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

2 oz dry whole-wheat short pasta (56 g)

3/8 cup part-skim ricotta (93 g)

1/2 cup no-salt-added tomato sauce (120 g)

2 cups prewashed baby spinach (60 g)

1 1/2 cups potable water (360 ml)

Method

1. Combine pasta and water in an 8-cup microwave-safe bowl. Cover loosely and vent; heat 4 minutes, stir, then use 1-minute bursts until tender, about 10-14 minutes total. Drain carefully.

2. Add sauce and spinach. Heat, stirring, until spinach wilts and mixture reaches 165 F.

3. Spoon ricotta over the hot pasta. Stir gently and eat promptly.

Contains: milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 28 / MICROWAVE MEALS

Black Bean Chicken Quesadilla

A microwave gives a soft tortilla, not a crisp browned shell. The photograph reflects that.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 28 / TIER 2

Black Bean Chicken Quesadilla

Makes 1 serving | Prep 4 min | Heat 4 min | Rest/chill 1 min

Total 9 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
440 kcal	35 g	45 g	10 g	14 g	680 mg

Sodium band: YELLOW

Food cost approx. $2.48 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1 medium whole-wheat tortilla (45 g)

1/2 cup canned no-salt-added black beans (85 g), drained and rinsed

1 pouch plain ready-to-eat chicken (2.6 oz / 74 g)

1 oz shredded cheddar (28 g)

1 Tbsp salsa (15 g)

Method

1. Mash beans coarsely and mix with chicken in a microwave-safe bowl. Cover, vent and heat in 30-second bursts, stirring, to 165 F.

2. Spread filling on half the tortilla and scatter cheddar over it. Fold shut on a microwave-safe plate.

3. Heat 20-30 seconds until cheese softens. Stand 1 minute and cut into wedges; serve salsa alongside.

Contains: milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 29 / MICROWAVE MEALS

Chicken Noodle Soup

Use unsalted broth. Regular broth can add more sodium than the rest of the bowl.

30 g+ protein / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 29 / TIER 2

Chicken Noodle Soup

Makes 1 serving | Prep 5 min | Heat 16 min | Rest/chill 1 min

Total 22 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
270 kcal	32 g	29 g	6 g	3 g	390 mg

Sodium band: GREEN

Food cost approx. $3.35 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1 oz dry whole-wheat short pasta (28 g)

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1 1/2 cups unsalted chicken or vegetable broth (360 ml)

1/2 cup prewashed shredded carrots (55 g)

1 cup prewashed baby spinach (30 g)

1/2 cup potable water (120 ml)

1/8 tsp ground black pepper

Method

1. Place broth, water, carrots and dry pasta in an 8-cup microwave-safe bowl. Cover loosely and vent.

2. Heat 4 minutes, stir, then continue in 1-minute bursts until pasta is tender, about 10-14 minutes total. Watch for boil-over.

3. Add chicken and spinach. Heat and stir to 165 F; broth should bubble. Stand 1 minute before lifting the lid away from your face.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 30 / MICROWAVE MEALS

Southwest Sweet Potato

A small sweet potato cooks more predictably than a very large one.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 30 / TIER 2

Southwest Sweet Potato

Makes 1 serving | Prep 4 min | Heat 10 min | Rest/chill 2 min

Total 16 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
405 kcal	36 g	61 g	12 g	2 g	440 mg

Sodium band: GREEN

Food cost approx. $2.95 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1 small sweet potato (180 g), scrubbed

1/2 cup canned no-salt-added black beans (85 g), drained and rinsed

1 pouch plain ready-to-eat chicken (2.6 oz / 74 g)

2 Tbsp salsa (30 g)

3/8 cup plain nonfat Greek yogurt (85 g)

1/4 tsp ground cumin

Method

1. Pierce sweet potato; microwave on a plate 4 minutes, turn, then use 1-minute bursts until tender. Stand 2 minutes.

2. Combine beans, chicken and cumin with 1 Tbsp water in a vented covered bowl. Heat and stir in short bursts to 165 F.

3. Split the potato and add filling, salsa and yogurt. Eat promptly.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 31 / MICROWAVE MEALS

Salmon Couscous Cup

Instant couscous absorbs hot water. Pearl couscous needs simmering and will not work by this method.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 31 / TIER 2

Salmon Couscous Cup

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 5 min

Total 14 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
415 kcal	28 g	51 g	9 g	10 g	260 mg

Sodium band: GREEN

Food cost approx. $2.24 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1/3 cup dry instant whole-wheat couscous (55 g)

3 oz canned pink salmon (85 g), drained

1/2 cup frozen peas (80 g)

1 Tbsp lemon or lime juice (15 ml)

1 tsp olive oil (5 ml)

1/2 cup potable water (120 ml)

Method

1. Heat measured water in a vented covered 4-cup microwave bowl until boiling, about 2 minutes. Stir in instant couscous; cover off heat for the package time, about 5 minutes.

2. Cook peas separately according to package directions. Fluff couscous with a fork.

3. Fold in peas, salmon, oil and lemon. Heat covered and vented in short bursts, stirring, to 165 F. Stand 1 minute.

Contains: fish, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 32 / MICROWAVE MEALS

Chicken Pizza Pita

Keep the topping shallow so the pita supports it. Expect a soft base rather than oven crispness.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 32 / TIER 2

Chicken Pizza Pita

Makes 1 serving | Prep 4 min | Heat 4 min | Rest/chill 1 min

Total 9 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
355 kcal	32 g	41 g	6 g	8 g	700 mg

Sodium band: YELLOW

Food cost approx. $2.71 per serving

700 W cooking output; example 1,100 W input. 700 W output microwave; suitable approved supply.

Ingredients

1 small whole-wheat pita (60 g)

1 pouch plain ready-to-eat chicken (2.6 oz / 74 g)

1 oz part-skim mozzarella (28 g)

1/4 cup no-salt-added tomato sauce (60 g)

1 cup prewashed baby spinach (30 g)

Method

1. Mix chicken, sauce and spinach in a vented covered microwave bowl. Heat and stir in short bursts to 165 F.

2. Spread over pita on a microwave-safe plate and add mozzarella. Heat 20-40 seconds until cheese softens. Stand 1 minute.

Contains: milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 33 / MICROWAVE MEALS

Cheesy Polenta and Beans

Use instant polenta with microwave directions; coarse cornmeal needs a different cooking method.

36 Lemon White Bean Chicken

37 Tomato Lentil Polenta

38 Peanut Chicken Noodles

39 Smoky Black Bean Sweet Potato

40 Herbed Tuna Potato Bowl

41 Chicken Broccoli Brown Rice

42 Turkey Tomato Pasta

43 Chickpea Tomato Couscous

44 Ginger Edamame Rice

FAST HEAT FIRST. These recipes require an approved rapid-heating source before optional direct-12V holding. They are not 12V-only reheating instructions.

RECIPE 35 / 12V LUNCHBOX STOVE AND HOTLOGIC

Lunchbox Chicken Salsa Rice

Keep the layer shallow in the approved container. Do not pack a dense brick of chilled rice.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 35 / TIER 2 + 1

Lunchbox Chicken Salsa Rice

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 0 min

Total 9 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
405 kcal	36 g	56 g	9 g	4 g	440 mg

Sodium band: GREEN

Food cost approx. $3.20 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific about 45-144 W. 700 W output microwave; optional approved 12V lunchbox warmer.

Ingredients

3/4 cup plain ready-to-eat brown rice (150 g)

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/2 cup canned no-salt-added black beans (85 g), drained and rinsed

2 Tbsp salsa (30 g)

1/4 tsp ground cumin

Method

1. Mix rice, chicken, beans, salsa, cumin and 2 Tbsp potable water in a microwave-safe 4-cup bowl.

2. Rapidly heat covered and vented, stirring after 2 minutes and then every 30 seconds, to 165 F throughout.

3. Follow the hot-holding transfer protocol below, or eat immediately.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 36 / 12V LUNCHBOX STOVE AND HOTLOGIC

Lemon White Bean Chicken

Use a leak-resistant food container approved for your warmer. Hot liquid and a loose lid are a burn risk.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

Ingredients

3/4 cup fully cooked plain polenta (180 g)

3/4 cup cooked no-salt-added lentils (150 g), ready to eat

1/2 cup no-salt-added tomato sauce (120 g)

1 tsp olive oil (5 ml)

1/4 tsp smoked paprika

Method

1. Break fully cooked polenta into small pieces in a 4-cup microwave bowl. Add lentils, sauce, oil and paprika.

2. Cover, vent and heat 2 minutes. Stir thoroughly, then use 30-second bursts to 165 F throughout.

3. Transfer for monitored hot holding or eat now. Add a spoon of potable water if thick.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 38 / 12V LUNCHBOX STOVE AND HOTLOGIC

Peanut Chicken Noodles

A little water prevents the peanut sauce from becoming paste as the noodles stand.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 38 / TIER 2 + 1

Peanut Chicken Noodles

Makes 1 serving | Prep 5 min | Heat 5 min | Rest/chill 0 min

Total 10 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
450 kcal	38 g	46 g	8 g	15 g	290 mg

Sodium band: GREEN

Food cost approx. $2.87 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific about 45-144 W. 700 W output microwave; optional approved 12V lunchbox warmer.

Ingredients

1 cup fully cooked whole-wheat pasta (140 g)

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/2 cup prewashed shredded cabbage (35 g)

1 1/2 Tbsp unsalted peanut butter (24 g)

1 Tbsp lemon or lime juice (15 ml)

1/4 tsp ground ginger

1/8 cup potable water (30 ml)

Method

1. Whisk peanut butter, lemon, ginger and 2 Tbsp water in a microwave bowl.

2. Toss in fully cooked pasta, chicken and cabbage. Cover and vent; heat 2 minutes, stir, then use 30-second bursts until 165 F throughout.

3. Transfer for monitored hot holding or serve immediately.

Contains: peanuts, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 39 / 12V LUNCHBOX STOVE AND HOTLOGIC

Smoky Black Bean Sweet Potato

This plant-based portion has less than 30 g protein. The beans still contribute useful fiber.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 39 / TIER 2 + 1

Smoky Black Bean Sweet Potato

Makes 1 serving | Prep 4 min | Heat 6 min | Rest/chill 0 min

Total 10 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
420 kcal	16 g	88 g	19 g	2 g	120 mg

Sodium band: GREEN

Food cost approx. $2.04 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific about 45-144 W. 700 W output microwave; optional approved 12V lunchbox warmer.

Ingredients

1 small fully cooked sweet potato (180 g), diced

3/4 cup canned no-salt-added black beans (128 g), drained and rinsed

1/2 cup no-salt-added canned corn (80 g), drained

1/2 cup no-salt-added canned diced tomatoes with juice (120 g)

1/4 tsp smoked paprika

1/4 tsp ground cumin

Method

1. Mix fully cooked sweet potato, beans, corn, tomatoes and spices in a microwave-safe 4-cup bowl.

2. Cover and vent. Heat 2 minutes, stir and use 30-second bursts until 165 F throughout.

3. Transfer for monitored hot holding or eat immediately.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 40 / 12V LUNCHBOX STOVE AND HOTLOGIC

Herbed Tuna Potato Bowl

Cook and chill potatoes safely at home; a warmer is not a way to cook a raw potato.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 40 / TIER 2 + 1

Herbed Tuna Potato Bowl

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 0 min

Total 9 min; optional holding, batch cooling and thawing additional.

Sodium band: GREEN

Food cost approx. $1.79 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific about 45-144 W. 700 W output microwave; optional approved 12V lunchbox warmer.

Ingredients

1 cup fully cooked whole-wheat pasta (140 g)

3 oz fully cooked unseasoned lean ground turkey (85 g)

1/2 cup no-salt-added tomato sauce (120 g)

1 tsp olive oil (5 ml)

1/8 tsp ground black pepper

Method

1. Mix fully cooked pasta and turkey with sauce, oil and pepper in a 4-cup microwave bowl.

2. Cover, vent and heat 2 minutes. Stir, then use 30-second bursts until 165 F throughout.

3. Transfer for monitored hot holding or serve now.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 43 / 12V LUNCHBOX STOVE AND HOTLOGIC

Chickpea Tomato Couscous

A plant-based hot lunch. Count the complete portion rather than assuming the couscous alone is a meal.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 43 / TIER 2 + 1

Chickpea Tomato Couscous

Makes 1 serving | Prep 4 min | Heat 6 min | Rest/chill 5 min

Total 15 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
465 kcal	18 g	82 g	18 g	8 g	90 mg

Sodium band: GREEN

Food cost approx. $1.59 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific about 45-144 W. 700 W output microwave; optional approved 12V lunchbox warmer.

Ingredients

1/3 cup dry instant whole-wheat couscous (55 g)

3/4 cup canned no-salt-added chickpeas (128 g), drained and rinsed

1/2 cup no-salt-added canned diced tomatoes with juice (120 g)

1/2 cup fully cooked carrots (80 g)

1 tsp olive oil (5 ml)

1/2 cup potable water (120 ml)

Method

1. Boil measured water in a microwave-safe bowl; add instant couscous, cover off heat and stand for package time, about 5 minutes.

2. Stir in chickpeas, tomatoes, fully cooked carrots and oil. Cover, vent and rapidly heat in short bursts, stirring, to 165 F throughout.

3. Transfer for monitored hot holding or eat immediately.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 44 / 12V LUNCHBOX STOVE AND HOTLOGIC

Ginger Edamame Rice

Frozen edamame must be cooked according to its package before entering this holding workflow.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 44 / TIER 2 + 1

Ginger Edamame Rice

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 0 min

Total 9 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
375 kcal	18 g	56 g	12 g	9 g	270 mg

Sodium band: GREEN

Food cost approx. $2.00 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific about 45-144 W. 700 W output microwave; optional approved 12V lunchbox warmer.

Ingredients

3/4 cup plain ready-to-eat brown rice (150 g)

3/4 cup fully cooked shelled edamame (112 g)

1/2 cup fully cooked carrots (80 g)

1/2 cup prewashed shredded cabbage (35 g)

1/4 tsp ground ginger

1 tsp reduced-sodium soy sauce (5 ml)

1 tsp sesame seeds (3 g)

Method

1. Mix rice, fully cooked edamame and carrots, cabbage, ginger, soy sauce and 2 Tbsp water.

2. Cover and vent. Rapidly microwave, stirring after 2 minutes and every 30 seconds thereafter, to 165 F.

3. Add sesame seeds; transfer for monitored hot holding or serve now.

Contains: sesame, soy, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

CHAPTER 05 / 7 RECIPES

12V Slow Cooker

Use the slow cooker only for holding food already heated to 165 F by a suitable fast method. Confirm it keeps every part at 140 F or above. A nominal 96 W rating does not establish food safety or approve operation while driving.

45 Road Chili for Two

46 White Chicken Bean Stew

47 Tomato Lentil Supper

48 Chicken Corn Chowder

49 Turkey Kidney Bean Pot

50 Coconut Chickpea Curry

51 Chicken Barley Vegetable Pot

FAST HEAT FIRST. These recipes require an approved rapid-heating source before optional direct-12V holding. They are not 12V-only reheating instructions.

RECIPE 45 / 12V SLOW COOKER

Road Chili for Two

Two portions fit only if your cooker's minimum and maximum fill rules permit. Use a larger fast-heating vessel, not an overflowing crock.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 45 / TIER 2 + 1

Road Chili for Two

Makes 2 servings | Prep 6 min | Heat 10 min | Rest/chill 0 min

Total 16 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
330 kcal	38 g	29 g	10 g	7 g	390 mg

Sodium band: GREEN

Food cost approx. $3.32 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific around 96 W. 700 W output microwave; optional compatible 12V slow cooker.

Ingredients

1 cup canned no-salt-added black beans (170 g), drained and rinsed

1 cup no-salt-added canned diced tomatoes with juice (240 g)

3 pouches plain ready-to-eat chicken (7.8 oz / 222 g)

1 cup prewashed sliced bell pepper (90 g)

1 oz shredded cheddar (28 g)

1/2 tsp ground cumin

1/2 tsp smoked paprika

Method

1. Combine beans, tomatoes, chicken, diced pepper and spices in a large microwave-safe bowl with a vented lid.

2. Microwave 3 minutes, stir well, then use 1-minute bursts until pepper is tender and all parts reach 165 F.

3. Transfer hot chili to the compatible 12V cooker for monitored holding, or serve at once. Divide into two portions and add cheddar.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

RECIPE 46 / 12V SLOW COOKER

White Chicken Bean Stew

Drain beans before measuring so the stew is thick enough to carry without splashing.

30 g+ protein / 6 g+ fiber / Under $5 estimated

Food cost approx. $3.29 per serving

Rapid heat: microwave input about 1,100 W; optional 12V hold: label-specific around 96 W. 700 W output microwave; optional compatible 12V slow cooker.

Ingredients

1 1/2 cups fully cooked pearl barley (240 g)

3 pouches plain ready-to-eat chicken (7.8 oz / 222 g)

1 cup fully cooked carrots (160 g)

1 cup fully cooked peas (160 g)

2 cups unsalted chicken or vegetable broth (480 ml)

1/4 tsp ground black pepper

Method

1. Combine fully cooked barley, chicken, fully cooked carrots and peas, broth and pepper in a large vented microwave bowl.

2. Rapidly heat 3 minutes, stir and use 1-minute bursts to 165 F throughout.

3. Transfer for monitored hot holding or serve as two bowls.

Contains: barley. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Optional 12V holding: after rapid heating to 165 F, transfer promptly only as the appliance manual permits. Keep every part at 140 F or above, covered; check at least every 30 minutes while parked. Limit this book's optional hold to 60 minutes. If your setup cannot maintain temperature, skip holding and eat immediately. No cold-start slow reheating. [S1, S4]

CHAPTER 06 / 6 RECIPES

Kettle Only Meals

Boil potable water in the kettle and assemble in a separate heatproof bowl. The foods added afterward must already be safe to eat without further cooking. This is not a way to cook raw meat or reheat leftovers.

52 Lemon Chicken Couscous

53 Curry Lentil Couscous

54 Peanut Noodle Cup

55 Savory Oat and Egg Bowl

56 Instant Mash Chicken Bowl

57 Tomato White Bean Soup Cup

RECIPE 52 / KETTLE ONLY MEALS

Lemon Chicken Couscous

Check that the chicken is labeled fully cooked and ready to eat without heating.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 52 / TIER 2

Lemon Chicken Couscous

Makes 1 serving | Prep 5 min | Heat 5 min | Rest/chill 5 min

Total 15 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
415 kcal	36 g	51 g	8 g	9 g	290 mg

Sodium band: GREEN

Food cost approx. $2.68 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1/3 cup dry instant whole-wheat couscous (55 g)

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/4 cup canned no-salt-added chickpeas (42 g), drained and rinsed

1 Tbsp lemon or lime juice (15 ml)

1 tsp olive oil (5 ml)

1/2 cup potable water (120 ml)

1/8 tsp ground black pepper

Method

1. Boil measured water in the kettle. Put instant couscous in a heatproof 4-cup bowl, add boiling water and cover off heat for package time, about 5 minutes.

2. Fluff with a fork. Stir in freshly opened ready-to-eat chicken and chickpeas, lemon, oil and pepper.

3. Eat immediately. This is assembly with ready-to-eat proteins, not reheating chilled leftovers.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 53 / KETTLE ONLY MEALS

Curry Lentil Couscous

Choose lentil pouches that explicitly permit eating without further cooking.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 53 / TIER 2

Curry Lentil Couscous

Makes 1 serving | Prep 5 min | Heat 5 min | Rest/chill 5 min

Total 15 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
425 kcal	22 g	74 g	19 g	6 g	50 mg

Sodium band: GREEN

Food cost approx. $1.56 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1/3 cup dry instant whole-wheat couscous (55 g)

3/4 cup cooked no-salt-added lentils (150 g), ready to eat

1/4 cup no-salt-added canned diced tomatoes with juice (60 g)

1 cup prewashed baby spinach (30 g)

1/2 tsp salt-free curry powder

1 tsp olive oil (5 ml)

1/2 cup potable water (120 ml)

Method

1. Put instant couscous and curry in a heatproof bowl. Add measured boiling water from the kettle; cover for package time, about 5 minutes.

2. Fluff and stir in freshly opened ready-to-eat lentils, tomatoes, spinach and oil.

3. Eat immediately as a warm salad. The added ingredients cool the couscous; this does not validate reheating leftovers.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 54 / KETTLE ONLY MEALS

Peanut Noodle Cup

Thin rice noodles and ordinary dry pasta have different cooking instructions. Read the exact package before choosing a kettle-only meal.

30 g+ protein / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 54 / TIER 2

Peanut Noodle Cup

Makes 1 serving | Prep 5 min | Heat 5 min | Rest/chill 5 min

Total 15 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
490 kcal	35 g	57 g	4 g	14 g	330 mg

Sodium band: GREEN

Food cost approx. $3.21 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1 1/2 Tbsp unsalted peanut butter (24 g)

1/2 cup prewashed shredded carrots (55 g)

1 Tbsp lemon or lime juice (15 ml)

1/4 tsp ground ginger

2 cups potable water (480 ml)

2 oz thin rice noodles (56 g) labeled for hot-water steeping

Method

1. Use thin rice noodles whose package permits hot-water steeping, such as the thin variety in source S14. Put them in a heatproof bowl and cover with boiling water; stand for package time, usually 3-5 minutes, stirring occasionally, until tender. Use more potable water if needed to submerge them. Drain carefully, reserving 2 Tbsp water.

2. Mix peanut butter, lemon and ginger with reserved hot water. Toss with noodles, carrots and freshly opened ready-to-eat chicken.

3. Eat immediately. If the noodle package requires simmering, choose another product or use the microwave pasta method in Recipe 24 with its listed pasta. [S14]

Contains: peanuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 55 / KETTLE ONLY MEALS

Savory Oat and Egg Bowl

The eggs are already cooked and safe to eat cold. Boiling water does not cook a raw egg reliably.

Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 55 / TIER 2

Savory Oat and Egg Bowl

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 5 min

Total 14 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
360 kcal	22 g	30 g	5 g	17 g	260 mg

Sodium band: GREEN

Food cost approx. $1.96 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1/2 cup plain quick oats (40 g)

2 large commercially hard-boiled eggs (100 g), kept cold

1 cup prewashed baby spinach (30 g)

1/2 oz shredded cheddar (14 g)

1/8 tsp ground black pepper

3/4 cup potable water (180 ml)

Method

1. Put quick oats and spinach in a heatproof bowl. Add measured boiling water, cover for package time, about 5 minutes, then stir.

2. Chop cold hard-boiled eggs and fold into the oats with cheddar and pepper. Eat immediately; do not hold the mixed bowl warm.

Contains: egg, milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 56 / KETTLE ONLY MEALS

Instant Mash Chicken Bowl

Select potato flakes that need only boiling water. Seasoned cups often contain much more sodium.

30 g+ protein / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 56 / TIER 2

Instant Mash Chicken Bowl

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 2 min

Total 11 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
330 kcal	38 g	39 g	4 g	3 g	330 mg

Sodium band: GREEN

Food cost approx. $3.08 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1/3 cup plain instant potato flakes (25 g)

1 1/2 pouches plain ready-to-eat chicken (3.9 oz / 111 g)

1/2 cup no-salt-added canned corn (80 g), drained

3/8 cup plain nonfat Greek yogurt (85 g)

3/4 cup potable water (180 ml)

1/8 tsp ground black pepper

Method

1. Boil measured water. Stir into plain instant potato flakes in a heatproof bowl, using the package water ratio if it differs. Stand 2 minutes.

2. Fold in freshly opened ready-to-eat chicken and corn. Add yogurt and pepper just before eating.

3. Eat immediately. This method is for assembly, not for bringing chilled meat to a reheating temperature.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 57 / KETTLE ONLY MEALS

Tomato White Bean Soup Cup

A wide bowl gives stirring room. A narrow travel mug can trap dense, cool pockets.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 57 / TIER 2

Tomato White Bean Soup Cup

Makes 1 serving | Prep 4 min | Heat 5 min | Rest/chill 5 min

Total 14 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
335 kcal	15 g	56 g	13 g	6 g	40 mg

Sodium band: GREEN

Food cost approx. $1.20 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

3/4 cup canned no-salt-added white beans (135 g), drained and rinsed

1/2 cup no-salt-added canned diced tomatoes with juice (120 g)

2 Tbsp plus 2 tsp dry instant whole-wheat couscous (28 g)

1 tsp olive oil (5 ml)

1 cup potable water (240 ml)

1/4 tsp smoked paprika

Method

1. Put instant couscous and paprika in a heatproof 4-cup bowl. Add measured boiling water, cover and stand for package time, about 5 minutes.

2. Stir in freshly opened ready-to-eat beans and tomatoes with their juice, plus olive oil.

3. Eat immediately as a warm soup. Use safe cold assembly ingredients; do not use this method to reheat leftovers.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

CHAPTER 07 / 6 RECIPES

Shore Power Suppers

Induction, skillet and air fryer recipes require an approved circuit and a safe parked cooking area. Raw meat recipes also require proper handwashing and equipment cleaning; choose a cooked-protein recipe if those facilities are missing.

60 Turkey Spinach Skillet Pasta

61 Crisp Tofu Broccoli Bowl

62 Air Fryer Chicken and Sweet Potato

63 Black Bean Egg Skillet

RECIPE 58 / SHORE POWER SUPPERS

Skillet Chicken Pepper Wraps

Use this recipe only where you can wash hands and clean raw-poultry equipment properly. Otherwise choose the cooked chicken bowl.

30 g+ protein / 6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 58 / TIER 3

Skillet Chicken Pepper Wraps

Makes 1 serving | Prep 8 min | Heat 12 min | Rest/chill 0 min

Total 20 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
505 kcal	44 g	56 g	8 g	12 g	560 mg

Sodium band: GREEN

Food cost approx. $2.82 per serving

Input planning range 1,000-1,800 W; exact nameplate controls. Approved skillet or induction setup.

Ingredients

4 oz raw boneless skinless chicken breast (113 g)

1 cup prewashed sliced bell pepper (90 g)

2 medium whole-wheat tortilla (90 g)

1 tsp olive oil (5 ml)

3/8 cup plain nonfat Greek yogurt (85 g)

1 Tbsp lemon or lime juice (15 ml)

1/4 tsp ground cumin

Method

1. At a proper washing setup, cut chicken into thin strips with separate raw-meat utensils. Keep raw chicken away from ready-to-eat ingredients.

2. Heat oil in a small skillet over medium heat. Add chicken and cumin; cook about 5-7 minutes, turning, until every thick piece reaches 165 F.

3. Add peppers and cook 3-4 minutes until tender. Divide into tortillas; top with yogurt and lemon.

Contains: milk, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 59 / SHORE POWER SUPPERS

Lemon Salmon Skillet

Use a separate clean plate for cooked fish. The plate that held raw fish is not ready for serving.

Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 59 / TIER 3

Lemon Salmon Skillet

Makes 1 serving | Prep 6 min | Heat 15 min | Rest/chill 0 min

Total 21 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
470 kcal	28 g	42 g	5 g	20 g	80 mg

Sodium band: GREEN

Food cost approx. $3.19 per serving

Input planning range 1,000-1,800 W; exact nameplate controls. Approved skillet or induction setup.

Ingredients

4 oz raw salmon fillet (113 g)

1 cup frozen green beans (100 g)

3/4 cup plain ready-to-eat brown rice (150 g)

1 tsp olive oil (5 ml)

1 Tbsp lemon or lime juice (15 ml)

1/8 tsp ground black pepper

1/8 cup potable water (30 ml)

Method

1. Heat oil in a lidded skillet over medium heat. Cook salmon about 4 minutes per side, depending on thickness, to 145 F in the thickest part; move to a clean plate.

2. Add beans and 2 Tbsp water. Cover and cook according to the frozen vegetable package until tender.

3. Add ready-to-eat rice and heat through, stirring. Return salmon briefly, finish with lemon and pepper, and serve.

Contains: fish. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 60 / SHORE POWER SUPPERS

Turkey Spinach Skillet Pasta

A deep skillet prevents sauce from splashing near outlets. Keep its vent clear.

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 60 / TIER 3

Turkey Spinach Skillet Pasta

Makes 1 serving | Prep 7 min | Heat 24 min | Rest/chill 0 min

Total 31 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
455 kcal	32 g	49 g	10 g	14 g	150 mg

Sodium band: GREEN

Food cost approx. $2.46 per serving

Input planning range 1,000-1,800 W; exact nameplate controls. Approved skillet or induction setup.

Ingredients

4 oz raw 93% lean ground turkey (113 g)

2 oz dry whole-wheat short pasta (56 g)

1/2 cup no-salt-added tomato sauce (120 g)

2 cups prewashed baby spinach (60 g)

1 tsp olive oil (5 ml)

1 1/2 cups potable water (360 ml)

Method

1. Heat oil in a deep lidded skillet over medium heat. Crumble in raw turkey; cook 6-8 minutes, stirring, to 165 F.

2. Add dry pasta, tomato sauce and water. Simmer covered, stirring often, about 12-16 minutes until pasta is tender. Add a little potable water if needed.

3. Fold in spinach until wilted. Check the finished mixture is hot throughout and serve.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 61 / SHORE POWER SUPPERS

Crisp Tofu Broccoli Bowl

Drying tofu improves browning. High heat is not a substitute for patience and stable cookware.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 61 / TIER 3

Crisp Tofu Broccoli Bowl

Makes 1 serving | Prep 7 min | Heat 16 min | Rest/chill 0 min

Total 23 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
430 kcal	24 g	45 g	7 g	20 g	240 mg

Sodium band: GREEN

Food cost approx. $2.08 per serving

Input planning range 1,000-1,800 W; exact nameplate controls. Approved skillet or induction setup.

Ingredients

6 oz firm tofu (170 g), drained

1 cup frozen broccoli florets (90 g)

3/4 cup plain ready-to-eat brown rice (150 g)

2 tsp olive oil (10 ml)

1/4 tsp ground ginger

1 tsp reduced-sodium soy sauce (5 ml)

1/8 cup potable water (30 ml)

Method

1. Pat drained tofu dry with clean paper towels and cut into 3/4-inch cubes.

2. Heat oil in a skillet over medium heat. Brown tofu 8-10 minutes, turning gently.

3. Add broccoli and 2 Tbsp water; cover and cook according to vegetable package until fully cooked. Add rice, ginger and soy sauce; stir and heat thoroughly before serving.

Contains: soy, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 62 / SHORE POWER SUPPERS

Air Fryer Chicken and Sweet Potato

Basket size changes timing. Cook in batches if needed and confirm chicken temperature; keep the air outlet clear.

30 g+ protein / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 62 / TIER 3

Air Fryer Chicken and Sweet Potato

Makes 1 serving | Prep 8 min | Heat 24 min | Rest/chill 0 min

Total 32 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
370 kcal	38 g	40 g	5 g	6 g	150 mg

Sodium band: GREEN

Food cost approx. $2.17 per serving

Input planning range 1,000-1,800 W; exact nameplate controls. Approved compact air fryer.

Ingredients

4 oz raw boneless skinless chicken breast (113 g)

1 small sweet potato (180 g), scrubbed

1 tsp olive oil (5 ml)

1/4 tsp smoked paprika

3/8 cup plain nonfat Greek yogurt (85 g)

1 Tbsp lemon or lime juice (15 ml)

Method

1. With separate raw-meat tools, cut chicken into 1-inch pieces. Dice scrubbed sweet potato into 1/2-inch cubes.

2. Toss sweet potato with half the oil. Air-fry at 375 F for about 10 minutes, shaking once, until nearly tender.

3. Toss chicken with remaining oil and paprika. Add in a single layer; air-fry about 10-14 minutes more, turning, until chicken reaches 165 F and potato is tender. Mix yogurt and lemon as a dip.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 63 / SHORE POWER SUPPERS

Black Bean Egg Skillet

This edition specifies fully set eggs. A runny yolk photo would suggest a different safety endpoint.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 63 / TIER 3

Black Bean Egg Skillet

Makes 1 serving | Prep 6 min | Heat 15 min | Rest/chill 0 min

Total 21 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
435 kcal	25 g	50 g	12 g	15 g	330 mg

Sodium band: GREEN

Food cost approx. $2.30 per serving

Input planning range 1,000-1,800 W; exact nameplate controls. Approved skillet or induction setup.

Ingredients

2 large eggs (100 g edible portion)

1/2 cup canned no-salt-added black beans (85 g), drained and rinsed

1/2 cup no-salt-added canned diced tomatoes with juice (120 g)

1 cup prewashed sliced bell pepper (90 g)

1 tsp olive oil (5 ml)

1/2 small whole-wheat pita (30 g)

1/4 tsp ground cumin

Method

1. Heat oil in a small skillet; cook pepper and cumin over medium heat about 4 minutes.

2. Add tomatoes and beans. Simmer 4-5 minutes until hot; make two wells and crack an egg into each.

3. Cover and cook gently until whites and yolks are firm and the egg mixture reaches 160 F. Serve with pita.

Contains: egg, wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

CHAPTER 08 / 6 RECIPES

Home Time Batch Prep

Cook at home, divide into shallow portions, chill promptly and freeze. A cab fridge is for holding cold food; a crowded small unit may not safely chill several hot meals.

67 Home Batch Egg Breakfast Squares

68 Home Batch Chicken Meatballs

69 Home Batch Barley Bean Soup

RECIPE 64 / HOME TIME BATCH PREP

Home Batch Chicken Rice Packs

Write the cooking date and meal name on every container before it goes into the freezer.

30 g+ protein / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 64 / HOME + TIER 2

Home Batch Chicken Rice Packs

Makes 4 servings | Prep 12 min | Heat 30 min | Rest/chill 0 min

Total 42 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
360 kcal	32 g	41 g	5 g	8 g	80 mg

Sodium band: GREEN

Food cost approx. $2.14 per serving

Home supply varies; cab microwave reheat about 1,100 W input. Home kitchen; microwave for later rapid reheating.

Ingredients

16 oz raw boneless skinless chicken breast (452 g)

3 cups plain ready-to-eat brown rice (600 g)

4 cups frozen broccoli florets (360 g)

4 tsp olive oil (20 ml)

4 Tbsp lemon or lime juice (60 ml)

1/2 tsp ground black pepper

Method

1. At home, heat oven to 400 F. Place chicken in a baking dish, brush with oil and pepper and bake about 20-25 minutes, until thickest parts reach 165 F.

2. Cook broccoli according to package. Prepare ready-to-eat rice as directed. Slice chicken with clean utensils.

3. Divide chicken, rice and broccoli into four shallow meal containers. Add lemon. Follow the batch-cooling and freezing protocol below.

At home, divide into shallow containers and refrigerate promptly within 2 hours, or within 1 hour above 90 F; do not leave a full pot on the counter to cool. Keep at 40 F or below, then freeze extras at 0 F or below. This book recommends using frozen packs within 2 months for quality. Transport frozen with ice packs; thaw in the refrigerator. Use within 2 days after thawing and rapidly reheat to 165 F throughout. Cooling and thawing time are additional to the recipe time. [S1, S3]

RECIPE 65 / HOME TIME BATCH PREP

Home Batch Turkey Bean Chili

A shallow container chills a dense chili faster than a full pot. Leave space for cold air around containers.

30 g+ protein / 6 g+ fiber / Under $5 estimated

RECIPE 65 / HOME + TIER 2

Home Batch Turkey Bean Chili

Makes 4 servings | Prep 12 min | Heat 30 min | Rest/chill 0 min

Total 42 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
400 kcal	33 g	39 g	13 g	11 g	120 mg

Sodium band: GREEN

Food cost approx. $2.25 per serving

Home supply varies; cab microwave reheat about 1,100 W input. Home kitchen; microwave for later rapid reheating.

Ingredients

16 oz raw 93% lean ground turkey (452 g)

3 cups canned no-salt-added black beans (510 g), drained and rinsed

2 cups no-salt-added canned diced tomatoes with juice (480 g)

2 cups prewashed sliced bell pepper (180 g)

2 tsp olive oil (10 ml)

1 tsp ground cumin

1 tsp smoked paprika

Method

1. At home, heat oil in a large pot over medium heat. Add turkey and cook 8-10 minutes, breaking it up, until 165 F.

2. Add diced peppers and cook 4 minutes. Stir in beans, tomatoes, cumin and paprika.

3. Simmer 15 minutes, stirring, until vegetables are tender and chili is hot throughout. Divide into four shallow containers; cool and freeze as described below.

At home, divide into shallow containers and refrigerate promptly within 2 hours, or within 1 hour above 90 F; do not leave a full pot on the counter to cool. Keep at 40 F or below, then freeze extras at 0 F or below. This book recommends using frozen packs within 2 months for quality. Transport frozen with ice packs; thaw in the refrigerator. Use within 2 days after thawing and rapidly reheat to 165 F throughout. Cooling and thawing time are additional to the recipe time. [S1, S3]

RECIPE 66 / HOME TIME BATCH PREP

Home Batch Lentil Tomato Sauce

Pack sauce over pasta so it keeps the surface from drying during reheating.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 66 / HOME + TIER 2

Home Batch Lentil Tomato Sauce

Makes 4 servings | Prep 10 min | Heat 20 min | Rest/chill 0 min

Total 30 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
510 kcal	28 g	88 g	25 g	7 g	60 mg

Sodium band: GREEN

Food cost approx. $1.94 per serving

Home supply varies; cab microwave reheat about 1,100 W input. Home kitchen; microwave for later rapid reheating.

Ingredients

4 cups cooked no-salt-added lentils (800 g), ready to eat

2 cups no-salt-added tomato sauce (480 g)

4 cups prewashed baby spinach (120 g)

4 tsp olive oil (20 ml)

8 oz dry whole-wheat short pasta (224 g)

1/2 tsp ground black pepper

Method

1. At home, cook pasta in a pot of boiling water according to its package; drain.

2. In a second pot, combine cooked lentils, sauce, oil and pepper. Simmer 10 minutes; fold in spinach until wilted.

3. Divide pasta and sauce into four shallow containers. Cool promptly, then freeze using the protocol below.

Contains: wheat. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

At home, divide into shallow containers and refrigerate promptly within 2 hours, or within 1 hour above 90 F; do not leave a full pot on the counter to cool. Keep at 40 F or below, then freeze extras at 0 F or below. This book recommends using frozen packs within 2 months for quality. Transport frozen with ice packs; thaw in the refrigerator. Use within 2 days after thawing and rapidly reheat to 165 F throughout. Cooling and thawing time are additional to the recipe time. [S1, S3]

RECIPE 67 / HOME TIME BATCH PREP

Home Batch Egg Breakfast Squares

An oven time is an estimate. Probe the center of the egg bake rather than relying on a browned edge.

Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 67 / HOME + TIER 2

Home Batch Egg Breakfast Squares

Makes 4 servings | Prep 12 min | Heat 40 min | Rest/chill 0 min

Total 52 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
360 kcal	24 g	37 g	5 g	13 g	350 mg

Sodium band: GREEN

Food cost approx. $2.04 per serving

Home supply varies; cab microwave reheat about 1,100 W input. Home kitchen; microwave for later rapid reheating.

Ingredients

8 large eggs (400 g edible portion)

4 cups prewashed baby spinach (120 g)

2 cups prewashed sliced bell pepper (180 g)

1 cup 2% cottage cheese (226 g)

2 tsp olive oil (10 ml)

4 small potatoes (680 g), scrubbed

Method

1. At home, heat oven to 375 F and lightly oil an 8-inch square baking dish. Beat eggs and cottage cheese; stir in finely diced pepper and chopped spinach.

2. Pour into the dish and bake about 25-35 minutes, until center is set and reaches 160 F. Cook scrubbed pierced potatoes separately until tender.

3. Cut egg bake into eight equal squares. Pack two squares and one potato per shallow container. Cool promptly and freeze as described below.

Contains: egg, milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

At home, divide into shallow containers and refrigerate promptly within 2 hours, or within 1 hour above 90 F; do not leave a full pot on the counter to cool. Keep at 40 F or below, then freeze extras at 0 F or below. This book recommends using frozen packs within 2 months for quality. Transport frozen with ice packs; thaw in the refrigerator. Use within 2 days after thawing and rapidly reheat to 165 F throughout. Cooling and thawing time are additional to the recipe time. [S1, S3]

RECIPE 68 / HOME TIME BATCH PREP

Home Batch Chicken Meatballs

Each serving is four meatballs plus its quarter of the sauce and rice. Keep sizes even for predictable cooking.

30 g+ protein / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 68 / HOME + TIER 2

Home Batch Chicken Meatballs

Makes 4 servings | Prep 15 min | Heat 25 min | Rest/chill 0 min

Total 40 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
440 kcal	30 g	49 g	5 g	15 g	120 mg

Sodium band: GREEN

Food cost approx. $2.12 per serving

Home supply varies; cab microwave reheat about 1,100 W input. Home kitchen; microwave for later rapid reheating.

Ingredients

16 oz raw ground chicken (452 g)

1/2 cup rolled oats (40 g)

1 large egg (50 g edible portion)

2 cups no-salt-added tomato sauce (480 g)

3 cups plain ready-to-eat brown rice (600 g)

2 tsp olive oil (10 ml)

1/2 tsp smoked paprika

Method

1. At home, heat oven to 400 F. Mix ground chicken, oats, beaten egg and paprika gently. Form 16 equal meatballs with clean hands; wash hands afterward.

2. Place on a lightly oiled sheet pan and bake about 18-22 minutes until the centers reach 165 F.

3. Heat sauce; divide meatballs, sauce and rice into four shallow meal containers. Follow the cooling and freezing protocol below.

Contains: egg. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

At home, divide into shallow containers and refrigerate promptly within 2 hours, or within 1 hour above 90 F; do not leave a full pot on the counter to cool. Keep at 40 F or below, then freeze extras at 0 F or below. This book recommends using frozen packs within 2 months for quality. Transport frozen with ice packs; thaw in the refrigerator. Use within 2 days after thawing and rapidly reheat to 165 F throughout. Cooling and thawing time are additional to the recipe time. [S1, S3]

RECIPE 69 / HOME TIME BATCH PREP

Home Batch Barley Bean Soup

The measured barley is already cooked. If starting dry, cook a separate batch according to its package first.

6 g+ fiber / Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 69 / HOME + TIER 2

Home Batch Barley Bean Soup

Makes 4 servings | Prep 10 min | Heat 25 min | Rest/chill 0 min

Total 35 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
420 kcal	16 g	77 g	17 g	6 g	120 mg

Sodium band: GREEN

Food cost approx. $1.89 per serving

Home supply varies; cab microwave reheat about 1,100 W input. Home kitchen; microwave for later rapid reheating.

Ingredients

3 cups fully cooked pearl barley (480 g)

3 cups canned no-salt-added white beans (540 g), drained and rinsed

2 cups no-salt-added canned diced tomatoes with juice (480 g)

2 cups prewashed shredded carrots (220 g)

4 cups unsalted chicken or vegetable broth (960 ml)

4 tsp olive oil (20 ml)

1/2 tsp ground black pepper

Method

1. At home, combine fully cooked barley, beans, tomatoes, carrots, broth, oil and pepper in a large pot.

2. Bring to a boil, reduce heat and simmer 15-20 minutes until carrots are tender, stirring occasionally.

3. Divide into four shallow containers. Cool promptly and freeze according to the protocol below; leave freezer expansion space.

Contains: barley. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

At home, divide into shallow containers and refrigerate promptly within 2 hours, or within 1 hour above 90 F; do not leave a full pot on the counter to cool. Keep at 40 F or below, then freeze extras at 0 F or below. This book recommends using frozen packs within 2 months for quality. Transport frozen with ice packs; thaw in the refrigerator. Use within 2 days after thawing and rapidly reheat to 165 F throughout. Cooling and thawing time are additional to the recipe time. [S1, S3]

CHAPTER 09 / 4 RECIPES

Snacks for a Parked Break

Pack a measured snack before leaving. The research called these fatigue fighters; this edition uses a more accurate name. Food cannot replace sleep or authorize driving when tired.

70 Peanut Oat Energy Bites

71 Apple Peanut Crunch

72 Yogurt Cocoa Dip

73 Chickpea Trail Cup

RECIPE 70 / SNACKS FOR A PARKED BREAK

Peanut Oat Energy Bites

Energy is simply food energy here. These bites do not prevent fatigue or make drowsy driving safe.

Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 70 / TIER 0

Peanut Oat Energy Bites

Makes 2 servings | Prep 8 min | Heat 0 min | Rest/chill 30 min

Total 38 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
250 kcal	8 g	27 g	4 g	14 g	10 mg

Sodium band: GREEN

Food cost approx. $0.42 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1/2 cup rolled oats (40 g)

3 Tbsp unsalted peanut butter (48 g)

2 Tbsp raisins (20 g)

1/4 tsp ground cinnamon

1/8 cup potable water (30 ml)

Method

1. Mix oats, peanut butter, raisins and cinnamon with up to 2 Tbsp potable water, adding water gradually until the mixture holds together.

2. With clean hands or two spoons, form six equal balls. Refrigerate 30 minutes to firm up.

3. Divide into two servings of three bites. Keep cold and eat within 2 days.

Contains: peanuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 71 / SNACKS FOR A PARKED BREAK

Apple Peanut Crunch

Pre-portion nuts rather than eating from a large bag. Shelf-stable ingredients still need clean handling.

6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 71 / TIER 0

Apple Peanut Crunch

Makes 1 serving | Prep 3 min | Heat 0 min | Rest/chill 0 min

Total 3 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
270 kcal	7 g	32 g	7 g	15 g	10 mg

Sodium band: GREEN

Food cost approx. $1.02 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1 medium apple (180 g), rinsed and cored

1 Tbsp unsalted peanut butter (16 g)

1/2 oz unsalted almonds (14 g)

Method

1. Rinse and core the apple on a clean board, then cut into wedges.

2. Serve with measured peanut butter for dipping and almonds alongside. Eat while parked.

Contains: peanuts, tree nuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 72 / SNACKS FOR A PARKED BREAK

Yogurt Cocoa Dip

Cocoa tastes slightly bitter without added sugar. A ripe banana supplies sweetness.

Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 72 / TIER 0

Yogurt Cocoa Dip

Makes 1 serving | Prep 3 min | Heat 0 min | Rest/chill 0 min

Total 3 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

220 kcal	19 g	36 g	5 g	0 g	60 mg

Sodium band: GREEN

Food cost approx. $1.23 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

3/4 cup plain nonfat Greek yogurt (170 g)

2 tsp unsweetened cocoa powder (4 g)

1 medium banana (120 g)

1/4 tsp ground cinnamon

Method

1. Stir cocoa and cinnamon into yogurt until smooth.
2. Slice the peeled banana and dip as you eat. Keep yogurt at 40 F or below until serving.

Contains: milk. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep perishables at 40 F or below until preparation. Eat promptly; refrigerate leftovers in shallow containers within 2 hours, or 1 hour above 90 F. Use within 2 days or the shorter label instruction. Rapidly reheat cooked leftovers to 165 F; no slow-cooker reheating. [S1, S3]

RECIPE 73 / SNACKS FOR A PARKED BREAK

Chickpea Trail Cup

Canned chickpeas are moist and perishable after opening; they are not a substitute for dry roasted snack chickpeas.

6 g+ fiber / Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 73 / TIER 0

Chickpea Trail Cup

Makes 1 serving | Prep 2 min | Heat 0 min | Rest/chill 0 min

Total 2 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
220 kcal	9 g	28 g	7 g	9 g	10 mg

Sodium band: GREEN

Food cost approx. $0.75 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

1/4 cup commercially roasted unsalted chickpeas (28 g)

1/2 oz unsalted almonds (14 g)

1 Tbsp raisins (10 g)

Method

1. Mix commercially roasted unsalted chickpeas, almonds and raisins in a clean dry container.

2. Close the lid and portion one serving. Keep dry and follow the earliest package best-by guidance.

Contains: tree nuts. Check every package and cross-contact statement; this list is a guide, not an allergen guarantee.

Keep dry, sealed and away from excess heat. Follow the earliest ingredient package guidance. Use clean utensils.

CHAPTER 10 / 2 RECIPES

Hydration and Low Sugar Drinks

Water is useful without a complicated formula. Use potable water, clean bottles and your clinician's fluid advice when a medical condition requires it.

74 Cucumber Citrus Water

75 Cinnamon Orange Tea

RECIPE 74 / HYDRATION AND LOW SUGAR DRINKS

Cucumber Citrus Water

The estimate includes the cucumber and juice if consumed. Keep cut-produce water cold; plain potable water is the shelf-stable fallback.

Under $5 estimated / No cook

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 74 / TIER 0

Cucumber Citrus Water

Makes 1 serving | Prep 3 min | Heat 0 min | Rest/chill 0 min

Total 3 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
5 kcal	0 g	2 g	0 g	0 g	0 mg

Sodium band: GREEN

Food cost approx. $0.20 per serving

0 W cooking; cold storage additional. None; clean bowl or food container.

Ingredients

2 cups potable water (480 ml)

1/8 cup chopped rinsed cucumber (19 g)

1 Tbsp lemon or lime juice (15 ml)

Method

1. Wash cucumber before slicing. Put thin slices and lemon juice into a clean bottle.

2. Add potable water, close and refrigerate. Drink within 24 hours and wash the bottle between refills.

Use potable water and clean drinkware. Keep cut-produce water or prepared cold tea at 40 F or below and use within 24 hours. Tea steeping is not a disinfection method for unsafe water.

RECIPE 75 / HYDRATION AND LOW SUGAR DRINKS

Cinnamon Orange Tea

For a cold version, brew then refrigerate promptly in a clean covered container; use within 24 hours.

Under $5 estimated

AI-generated serving suggestion. Follow the measured ingredients and method on the next page.

RECIPE 75 / TIER 2

Cinnamon Orange Tea

Makes 1 serving | Prep 3 min | Heat 5 min | Rest/chill 5 min

Total 13 min; optional holding, batch cooling and thawing additional.

FUEL GAUGE / ESTIMATES PER SERVING

CALORIES	PROTEIN	CARBS	FIBER	FAT	SODIUM
5 kcal	0 g	2 g	0 g	0 g	0 mg

Sodium band: GREEN

Food cost approx. $0.26 per serving

Kettle input planning range 600-1,000 W; read nameplate. Water-only electric kettle; separate heatproof bowl.

Ingredients

1 1/2 cups potable water (360 ml)

1 decaffeinated black tea bag

1 thin orange slice (15 g), rinsed

1 small cinnamon stick, for steeping

Method

1. Boil potable water in a water-only kettle. Place tea bag and cinnamon stick in a heatproof mug.

2. Pour water over them and steep for the tea package time, about 3-5 minutes. Remove bag and stick; add rinsed orange slice.

3. Drink at a comfortable temperature while parked. Decaffeinated tea can contain some caffeine.

Use potable water and clean drinkware. Keep cut-produce water or prepared cold tea at 40 F or below and use within 24 hours. Tea steeping is not a disinfection method for unsafe water.

USE THE BOOK ON THE ROAD

Choose a meal for your next stop

No heating source

Use the cold breakfasts and Chapter 2. Keep perishable ingredients at 40 F or below. Without a reliable cooler, use newly opened ready-to-eat shelf-stable chicken or tuna, whole fruit, crackers and nuts; choose single portions and avoid creating leftovers.

Microwave available

Choose Chapter 3 or use the fast-heating stage in Chapters 4 and 5. For a shared microwave, obtain permission, cover the dish, leave the microwave clean and measure food temperature. Shared access is a convenience, not a reliable substitute for your cold chain.

Kettle available

Choose Chapter 6. Check the food package permits boiling-water assembly. Only water goes in the kettle. Handle boiling water over a stable work surface and leave room at the top of the bowl.

Proper cooking and washing area

Choose Chapter 7. Raw chicken, turkey and fish need separate handling and complete washing facilities. If the parking location or wash setup is unsuitable, change the meal rather than improvising around raw meat.

USE THE BOOK ON THE ROAD

A week with no cooking power

How to use this rotation

This is a meal rotation, not a nutritionally complete daily prescription. Add food and portions to match your needs. Keep perishables cold and shop midweek; never store seven days of prepared cold meals in the cab. A 12V-only truck can use this plan without relying on slow reheating.

Days 1 and 2

Day 1: Recipe 1 oats, Recipe 10 tuna wrap, Recipe 17 chicken bean salad. Day 2: Recipe 3 yogurt crunch, Recipe 14 hummus chicken box, Recipe 13 salmon bean salad. Mix only the next breakfast ahead.

Days 3 and 4

Day 3: Recipe 2 cottage oats, Recipe 15 egg wrap, Recipe 19 lentil bowl. Day 4: Recipe 4 banana wrap, Recipe 9 protein plate, Recipe 12 chickpea salad. Use a fresh top-up before Day 4 for cold dairy, eggs and produce.

Days 5 to 7

Day 5: Recipes 1, 11 and 16. Day 6: Recipes 3, 20 and 17. Day 7: Recipes 2, 14 and 13. Choose a snack from Chapter 9 if useful; water accompanies meals. Check portion and sodium totals with your own labels.

USE THE BOOK ON THE ROAD

Shop for the cold rotation

First three days

Count one serving of each recipe in Days 1-3 before shopping. Combine their ingredient lists, then subtract food you already have. Chicken and tuna pouches, oats, beans, nuts, tortillas and small pita packs form the shelf-stable base. Carry enough canned beans for measured drained portions, not an assumed whole-can serving.

Cold top-up

Buy only the yogurt, cottage cheese, cooked eggs, hummus, cheese and washed vegetables that fit at 40 F or below. Choose small packs and follow their shorter use-by instructions. Keep whole apples and bananas separate from raw meat or cleaning products.

Avoid the large-pack trap

A family-sized tub can be economical at home and wasteful in a small fridge. Compare the amount you will safely finish, not just price per ounce. If the pack leaves more than you can use within its safe storage window, buy smaller or change the rotation.

One simple replacement

If a salad ingredient is missing, use another ready-to-eat washed vegetable you already have. If the protein is missing, use a suitable ready-to-eat alternative and recalculate the panel. Do not replace chilled cooked eggs with raw eggs in a no-cook meal.

USE THE BOOK ON THE ROAD

A week with a microwave

Plan around cold storage

This rotation assumes a suitable microwave supply, a food thermometer and verified refrigeration. It does not assume daily idling, shore power at every stop or an unlimited battery bank. Prep one or two days at a time.

Days 1 and 2

Day 1: Recipe 5 breakfast tacos, Recipe 10 tuna wrap, Recipe 21 burrito bowl. Day 2: Recipe 1 oats, Recipe 14 chicken box, Recipe 22 broccoli chicken potato. Use the opened beans and yogurt across meals without extending their storage time.

Days 3 and 4

Day 3: Recipe 6 egg potato cup, Recipe 17 bean salad, Recipe 25 turkey chili. Day 4: Recipe 3 yogurt crunch, Recipe 11 chicken pita, Recipe 30 sweet potato. Restock fresh ingredients before Day 4; use thawed home-cooked turkey promptly.

Days 5 to 7

Day 5: Recipes 8, 13 and 34. Day 6: Recipes 1, 9 and 27. Day 7: Recipes 5, 19 and 29. Substitute a cold meal whenever safe parking, power or time is unavailable. Adjust portions and additions to your medical and energy needs.

USE THE BOOK ON THE ROAD

Shop for the microwave rotation

Stock the dry bin

Plain ready-to-eat brown rice; no-salt-added black, white and kidney beans; plain chicken and light tuna pouches; whole-wheat tortillas and pita; short whole-wheat pasta; no-salt-added tomato sauce; salt-free spices. Plain rice and ordinary dry rice have different preparation needs.

Stock the cooler

Plain yogurt, eggs, measured cheese, washed vegetables, small potatoes and sweet potatoes as appropriate for their storage conditions. Keep frozen vegetables frozen until safe use, or follow their labels after thawing. Cooked turkey for Day 3 must come from a safely chilled or frozen batch.

Count cold volume

Set the intended containers in the empty fridge before filling them. Leave circulation space and a visible thermometer. If the portions do not fit, reduce the shopping interval or use more unopened shelf-stable ingredients.

A practical fallback

Carry one no-cook protein plate or newly opened shelf-stable meal even on an inverter week. If the system trips, diagnose it according to the manual later. Dinner does not require bypassing a fuse or battery cutoff.

USE THE BOOK ON THE ROAD

Cross use the ingredients

Yogurt

Use plain yogurt in Recipes 1, 3, 10, 11, 15, 20 and 72. Keep the container cold, use a clean spoon and close it promptly. Do not stretch its safe storage life just because several recipes use it.

Beans and ready-to-eat chicken

Black beans serve Recipes 5, 17, 21, 28, 30 and 34. Chicken serves wraps, bowls and soups. Portion opened cans into covered food-safe containers and refrigerate promptly; label the opening date.

Cabbage and carrots

Cabbage works in Recipes 10, 12, 16, 38 and 44. Carrots work in slaw, soup and lunch boxes. Prewashed bags save preparation; reseal and refrigerate according to the label.

Grains and cheese

Plain ready-to-eat rice crosses breakfast, microwave and holding chapters. Pita works for lunch and pizza. Cheese is an accent that adds sodium as well as flavor; measure it rather than assuming a large handful equals a serving.

USE THE BOOK ON THE ROAD

Lower sodium without losing dinner

Start at the shelf

Compare equal weights of chicken, tuna, cheese, bread and sauces. Choose no-salt-added beans, tomatoes and broth when available. Rinsing beans may reduce sodium, but this book does not apply a guaranteed percentage reduction. The ingredient model assumes no-salt-added products. [S9]

Use acidity and spice

Lemon, lime, cumin, paprika, pepper and ginger add flavor without relying on salt. A salt-free seasoning blend can replace a salty packet, but check the ingredient list. Potassium-based salt substitutes may be unsuitable for some kidney conditions or medicines; ask your clinician.

Make a measurable swap

If your tortilla contains 400 mg sodium and the model assumes 240 mg, add 160 mg to the recipe total for every tortilla used, then divide by servings. That is more useful than trusting the printed color when your brand differs.

Understand RED

A RED panel marks more than 750 mg per serving in this model. Try replacing one cottage-cheese portion with plain yogurt or reducing bread, cheese or sauce according to the recipe. Recalculate the whole meal. GREEN is not a medical endorsement and 600 mg is not the regulated definition of low sodium. [S9]

USE THE BOOK ON THE ROAD

Portions that work for you

Start with the actual yield

A recipe that makes two is not automatically one large meal. Divide the finished food by weight or into equal containers. If you eat both portions, double the displayed nutrition and cost.

Keep protein claims modest

Some meals reach the editorial 30 g protein target; others do not. Adding a half yogurt portion or a ready-to-eat chicken portion changes the totals. Use your own plan, especially if a clinician has limited protein, potassium, sodium or fluids.

Carbohydrate is visible

The panel lists total carbohydrate and fiber separately. A person using insulin or another glucose-lowering medicine needs a personal meal and medication plan. This book does not label recipes diabetes-safe or prescribe medication changes.

Snacks and drinks are different

A snack can help fill a gap between meals but cannot fix unsafe fatigue. The two drink recipes add variety to potable water; they are not meal replacements or electrolyte treatment.

USE THE BOOK ON THE ROAD

Cool freeze and carry

Cool at home

Divide cooked batches into shallow containers promptly. Place them in the refrigerator rather than waiting for a large pot to become room temperature. If the batch is too large for your equipment to cool safely, make a smaller one. Use an ice-water bath where appropriate to speed cooling. [S3]

Freeze extra portions

Keep refrigerated food at 40 F or below; freeze extras at 0 F or below in freezer-safe containers. Leave expansion space for soups. Label the meal, cooking date, number of portions and thawing instructions. The book's 2-month frozen window is a quality recommendation.

Thaw and reheat

Transport frozen food in an insulated cooler with frozen packs. Thaw in the refrigerator, never on the dashboard or counter. Rapidly reheat the portion you will eat to 165 F, stirring and checking several locations. A 12V slow cooker is not the reheating step. [S1, S4]

When the cold chain fails

Know when cooling was lost and check temperature with a thermometer. If you cannot establish safe handling history, discard the food. Reheating cannot reliably remove toxins that may have formed during unsafe storage.

USE THE BOOK ON THE ROAD

A cab card to keep close

Before opening food

Park safely. Check the cold-storage thermometer and your approved power supply. Wash hands. Clear and clean the work surface. Read the ingredient list and method through to the end.

Cold and time

Cold food: 40 F or below. Frozen food: 0 F or below. Unrefrigerated perishables: no more than 2 hours, or 1 hour above 90 F. Count the entire exposure. Unknown history means discard. [S3]

Cooking endpoints

Poultry: 165 F. Fish: 145 F. Egg dishes: 160 F and fully set. Reheated leftovers: 165 F throughout. Stir microwave meals and allow standing time. Optional hot holding starts hot and stays at 140 F or above. [S1, S2, S4]

Before leaving

Switch off and unplug cooking equipment as directed. Cool or discard leftovers promptly. Wash, rinse and sanitize as appropriate; air dry. Dispose of wastewater at an authorized facility. Secure food and equipment for travel. Never handle a hot meal while driving.

USE THE BOOK ON THE ROAD

A savings example you can replace

Use your receipts

Suppose a purchased meal costs $14 and the ingredients actually used in a cab meal cost $4.50. The difference is $9.50. Replacing five meals would save $47.50 before equipment, electricity, spoilage, taxes and extra travel. This is arithmetic using assumed inputs, not a promise of typical savings.

Count what you use

A $6 package that makes three servings contributes $2 per serving if all three are used. If half is wasted, the effective cost rises. Include oil, sauces, fruit and sides instead of counting only the protein.

Equipment payback

Divide the equipment amount you actually pay by your observed weekly net food savings. A $150 purchase divided by $30 a week is five weeks. Installation, batteries and maintenance can change the answer. Do not finance a system from a projected cookbook saving alone.

Keep taxes separate

Meal deductions and reimbursements depend on employment status, travel facts, tax year and other rules. This cookbook does not give a current per-diem rate or say every driver can deduct a fixed amount. Ask a qualified tax adviser about your situation.

USE THE BOOK ON THE ROAD

Food and your driving clock

Plan the stop

For drivers under the federal property-carrying rules, the FMCSA summary describes an 11-hour driving limit after 10 consecutive hours off duty and a 14-hour driving window. It also describes a qualifying 30-minute non-driving interruption after 8 cumulative hours of driving without such an interruption. Exceptions and other limits apply. [S6]

A meal is not a log status

A recipe time does not determine whether time is off duty, on duty or a qualifying break. Record duty status according to the applicable rules and your actual responsibilities. The 34-hour restart is an available provision, not a mandatory event every time a weekly limit is reached. [S6]

Rest remains the priority

Choose cold meals or short assembly when cooking would cut into needed sleep. If you are too tired to drive safely, stop in a safe location and follow your fatigue procedures. There is no food, spice combination or protein number that makes impaired driving safe. [S7]

Caffeine is optional

FDA cites 400 mg daily as an amount not generally associated with negative effects for most adults; it is not a target, a personal guarantee or driving permission. Count all sources, consider medications and sensitivity, and avoid using caffeine to replace needed sleep. Decaf can still contain caffeine. [S10]

USE THE BOOK ON THE ROAD

Check your understanding

The inverter question

Your microwave says 700 W cooking output and 1,100 W maximum consumption. Which number belongs in the electrical load calculation? What other loads and system limits must you consider?

The slow-cooker question

You have chilled chicken chili and a 96 W slow cooker, but no rapid-heating source. Is a four-hour warm-up the method this book permits? What meal could you choose instead?

The cold-food question

A yogurt cup has spent 45 minutes in a shopping bag and 30 minutes on a table in a cab above 90 F. Should it go back in the cooler for tomorrow?

The label question

Your chicken pouch has 300 mg sodium and the model uses 180 mg. You use 1.5 pouches in a one-serving meal. How much sodium should be added to the printed estimate?

USE THE BOOK ON THE ROAD

Answers and practical decisions

Electrical answer

Use the 1,100 W input figure for this example, then allow for the exact inverter's continuous and startup requirements, wiring, battery support and essential loads. The 700 W cooking output is for heating performance. Follow the actual manufacturers' requirements. [S8]

Slow-cooker answer

No. The method here rapidly reheats to 165 F before optional hot holding. Without that source, choose a safe cold meal or newly opened ready-to-eat food. Do not slowly reheat leftovers in a slow cooker. [S1, S4]

Cold-food answer

Discard it. The combined 75 minutes exceeds the 1-hour limit used above 90 F. Putting it back in the cooler does not erase the earlier exposure. [S3]

Label answer

Add 180 mg: the difference is 120 mg per pouch, multiplied by 1.5. Recalculate the color if needed. Also compare the pouch weight and the other nutrient values, since different serving sizes can make a direct comparison misleading.

EDITORIAL DECISIONS

What changed from the research

Structure

Used the final 10-chapter count of 75. Earlier 8-chapter and 85-recipe alternatives are superseded.

Low-draw safety

Removed cold-start slow-cooker reheating and blanket cooking-while-driving advice. Chapters 4 and 5 retain the requested subject but explicitly require rapid heating first and measured optional hot holding.

Electrical safety

Separated cooking output from electrical input; retained essential refrigeration; removed universal wire/fuse prescriptions and claims that small wattage guarantees safe battery duration.

Nutrition

Recomputed all 75 panels from an editable editorial model. The model is not verified USDA FoodData Central extraction or dietitian analysis. Used sodium planning bands rather than an incorrect 600 mg low-sodium label claim.

EDITORIAL DECISIONS

Claims kept within their evidence

Medical claims

Removed guarantees about fatigue, sleep onset, blood-glucose response, longevity, medical-card outcome and claimed industry life expectancy. Did not repeat dated prevalence figures as current.

Regulatory claims

Corrected the driving-break explanation and the optional nature of the 34-hour restart. Omitted fixed per-diem, idling, fines and publishing-price claims that would require separate current jurisdiction or platform review.

Shopping and sanitation

No guaranteed chain-wide inventory or truck-parking permission. Replaced wipe-only cleanup and outdoor wastewater disposal with washing/rinsing, label-directed sanitation and authorized waste disposal.

Provenance

Original research preserved unchanged. All serving photographs are AI generated, not photographs of kitchen-tested dishes or actual drivers. No physical appliance trials, shelf audit or registered dietitian review were performed.

FREIGHT UNIVERSITY

Keep learning and keep useful notes

Michael Thomas

Author of Big Rig, Small Kitchen, prepared for Freight University. This edition focuses on practical choices a driver can make in a small space without assuming unlimited power, cold storage or washing facilities.

Make the next edition better

Use the recipe test record to document real cooking results. Record brand labels, edible weights, portion yields, appliance model, temperatures and any failure. A photograph alone does not validate safe heating or nutrition.

One next step

Choose tomorrow's breakfast before you go to rest. Check the cold-storage temperature, set aside the ingredients and put the clean bowl where you can reach it while parked.
